Risk managers and investment managers utilize customizable Excel Add-in templates for early warning of default and downgrade risks in their portfolios

Welcome to CreditEdge™

Moody's Analytics CreditEdge offers an award winning solution for measuring the credit risk of listed entities, sovereigns and bonds globally. Its industry leading probability of default model, known as the Expected Default Frequency (EDF™), and cutting-edge analytics assist with portfolio risk management and provide early warning on your exposures before losses occur. Global coverage and forward-looking metrics are just some reasons why 300+ of the world's largest banks, asset managers, corporations, insurance firms and government institutions rely on CreditEdge. Through Cloud-based, flexible platforms, CreditEdge can be seamlessly integrated into your daily workflow. Whether you're looking for investment ideas or evaluating your counterparties, CreditEdge provides timely insights to help meet your business goals.

Broad Coverage

Global coverage of 60,000+ publicly traded firms, 1,800+ entities with daily credit default swap (CDS) spreads, and 250,000+ bonds help you manage your portfolio with confidence. Over 11,700 defaults covering 50 years in our global database contributes to the high statistical accuracy of the public firm EDF model. CreditEdge offers 250+ entity and industry data points including key financial ratios, industry group percentiles, stressed scenarios, relative value metrics for bond analysis, and downgrade risk measurement.

Robust Analytics

In an ever-changing global economy, early warning tools are needed to make better investment decisions. CreditEdge leverages the latest technologies to deliver tools that help you conduct peer analysis, screen investment opportunities, benchmark portfolios and industries, run scenario analysis, create custom charts and reports, uncover relevant news, and more. The CreditEdge Early Warning Toolkit, a proprietary research methodology, provides a practical approach for using EDF metrics to effectively monitor and hedge portfolios.

Seamless Delivery

You decide how you want to use CreditEdge, with no down time or extra costs for set-up. The CreditEdge website and Excel Add-in, with their intuitive design and interactive features, can support every step or your workflow. If you want to incorporate credit metrics into your internal processes, receive CreditEdge data you care about through a high-speed FTP software file. Feed large amounts of data into your internal website or desktop application utilizing a customizable Application Programming Interface (API) service.

Monitor public & private portfolio credit risks through the new Early Warning Toolkit web dashboard on the CreditEdge website
